

COLLET CHUCKS HSK63F HIGH SPEED LOW NOISE KleinOVERLINE

The increasing use of 5-axis machines has enabled to step up the possible workings and with it the need to perform operations in tight and hard to reach spaces.

In order to meet these needs with the utmost precision and excellent finishes we offer a range of special HSK63F tool holders for collets **ER16**, **ER32** and **DIN6388/EOC25**, balanced at grade **G 2.5** at **36,000 RPM**.

TIGHTEN USING TORQUE WRENCH (our Art. Z052)

Adjustable demount devices

Insert the collet chuck in the demount devices

Tighten the nut using the torque wrench

- Extended length tool holders, reaching 200 mm.
- G 2.5 balancing grade
- 36.000 RPM max
- No-noise nuts, with ground contours
